The PCIM Europe will soon be opening its doors again and turning Nuremberg into a hotspot for the power electronics industry. Visitors can look forward to numerous product innovations and a varied presentation program on current industry topics from 9 - 11 May 2023.

Three weeks before the start of the event, the current figures already speak for themselves. The extensive range of topics further suggests another successful edition of the leading international exhibition and conference for the industry and its applications this year.

At the exhibition, more than 500 exhibitors from over 30 countries will present a diverse range of products and services along the entire value chain on an area of around 30,000 m². The organizer Mesago Messe Frankfurt has registered new exhibitors from Germany, China, USA, Taiwan and Italy, among others. An overview of all exhibiting companies can be found in the online exhibitor list.

Extensive program on three stages

One highlight of the exhibition will be the three stages as exclusive platforms for knowledge exchange on different focus topics. On the Exhibitor Stage, interested parties have the opportunity to learn about

Mesago Messe Frankfurt GmbH
Rotebuehlstr. 83 – 85

the product innovations of exhibiting companies in short 20-minute presentations.

The Industry Stage agenda includes presentations and panel discussions on current research and development topics of the industry, including highlights such as "Progress in Development of GaN Power Devices" and "HV Silicon and SiC Power Semiconductors; Key Components for Sustainable Energy Solutions".

As part of the E-Mobility & Energy Storage Zone, the same-named stage will discuss what power electronics is capable of for electromobility and energy storage currently and in the future. In addition to the exciting program of presentations on the two trend topics, visitors can look forward to a networking area for intensive exchange with experts.

Those wishing to dive even deeper into the products and solutions of power electronics for these two application areas of electromobility and energy storage can find out more in Live Product Presentations at the stands of a total of 27 specialized exhibitors. These include onsemi, STMicroelectronics, Power Integrations and Infineon Technologies.

Top-class conference presentations

The accompanying conference at the PCIM Europe creates a unique platform with a combination of industry and science. Here, participants can go even deeper into the world of power electronics and find out about the latest research results and developments at first hand.

More than 350 lectures will cover all topics of the value chain. Once again this year, three special sessions will focus on particularly relevant industry topics:

- 10.5.2023, 9:50 – 11:50 a.m.: "Solutions for Future Medium Voltage Grids"
- 10.5.2023, 2:00 – 3:00 p.m.: "Power Electronics for E-Mobility"
- 11.5.2023, 9:50 – 11:10 a.m.: "Understanding Losses in WBG Power Devices"

In addition to the oral presentations in five conference rooms, the poster presentations offer an optimal discussion platform. For the first time this year, poster sessions will be held in the NCC Mitte entrance area on all three conference days. Exhibition visitors will also have access to the poster presentations and thus the chance for an exclusive 1:1 exchange with the experts.

Digital platform complements the PCIM Europe 2023

This year's exhibition and conference will be optimally supplemented with the "PCIM Europe digital". Until 30 June 2023, the online platform offers participants the opportunity to catch up on or review missed presentations from the conference and stages independent of time and place, and to discover exhibitor and product profiles. A highlight will be

PCIM Europe
Nuremberg, Germany,
9 – 11 May 2023

the live streaming of the conference presentations from Stage Brüssel 1 in Nuremberg.

Further information and tickets for the event can be found at pcim-europe.com.

About Mesago Messe Frankfurt

Mesago, founded in 1982 and located in Stuttgart, specializes in exhibitions and conferences on various topics of technology. The company belongs to the Messe Frankfurt Group. Mesago operates internationally and is not tied to a specific venue. With around 150 members of staff Mesago organizes events for the benefit of more than 3,300 exhibitors and over 110,000 trade visitors, conference delegates and speakers from all over the world. Numerous trade associations, publishing houses, scientific institutes and universities work with Mesago closely as advisers, co-organizers and partners. (mesago.com)

Background information: Sustainable Messe Frankfurt

The Messe Frankfurt Group is one of the world's leading trade fair, congress and event organisers with their own exhibition grounds. With a workforce of some 2,200* people at its headquarters in Frankfurt am Main and in 28 subsidiaries, it organises events around the world. Group sales in financial year 2022 were around €450 million*. We serve our customers' business interests efficiently within the framework of our Fairs & Events, Locations and Services business fields. One of Messe Frankfurt's key strengths is its powerful and closely knit global sales network, which covers around 180 countries in all regions of the world. Our comprehensive range of services – both onsite and online – ensures that customers worldwide enjoy consistently high quality and flexibility when planning, organising and running their events. We are using our digital expertise to develop new business models. The wide range of services includes renting exhibition grounds, trade fair construction and marketing, personnel and food services.

Sustainability is a central pillar of our corporate strategy. Here, we strike a healthy balance between ecological and economic interests, social responsibility and diversity.

For more information, please visit our website at: www.messefrankfurt.com/sustainability

With its headquarters in Frankfurt am Main, the company is owned by the City of Frankfurt (60 percent) and the State of Hesse (40 percent).
